CONFINS.R3 HIGHLIGHTS

Independent Systems

LOS, LMS, AMS, FMS, CMS, TMS are Standalone systems. Additionally, each system will be continuously enriched.

Microservices Design

Better Scalability, Fault Isolation, Data Security, and Time to Market (Agility)

Easy to Integrate

API-based design makes integration with other systems easier and standardized, 3rd Party Integration Ready.

Built in Engines

Workflow, Rule, Approval, Batch, Report, Journal, Notification Engines availability become Systems' Standard

Cloud Native Ready

Scalability and Flexibility, Infrastructure Reliability, Server Management, and Time to Market are improved by using Cloud-native technologies

Self Customization

Shared Solution as **Customization Tools** for MF to enhance their own process.

Digitalization Ready

Ready to connect to any **Digital Services** (OCR, Digital Signature, Omnichannel, etc.). Any manual and regular processes can be automated using **RPA**s.

Less System Downtime

With the new System Architecture Design, System Downtime become less

Center Group Processing

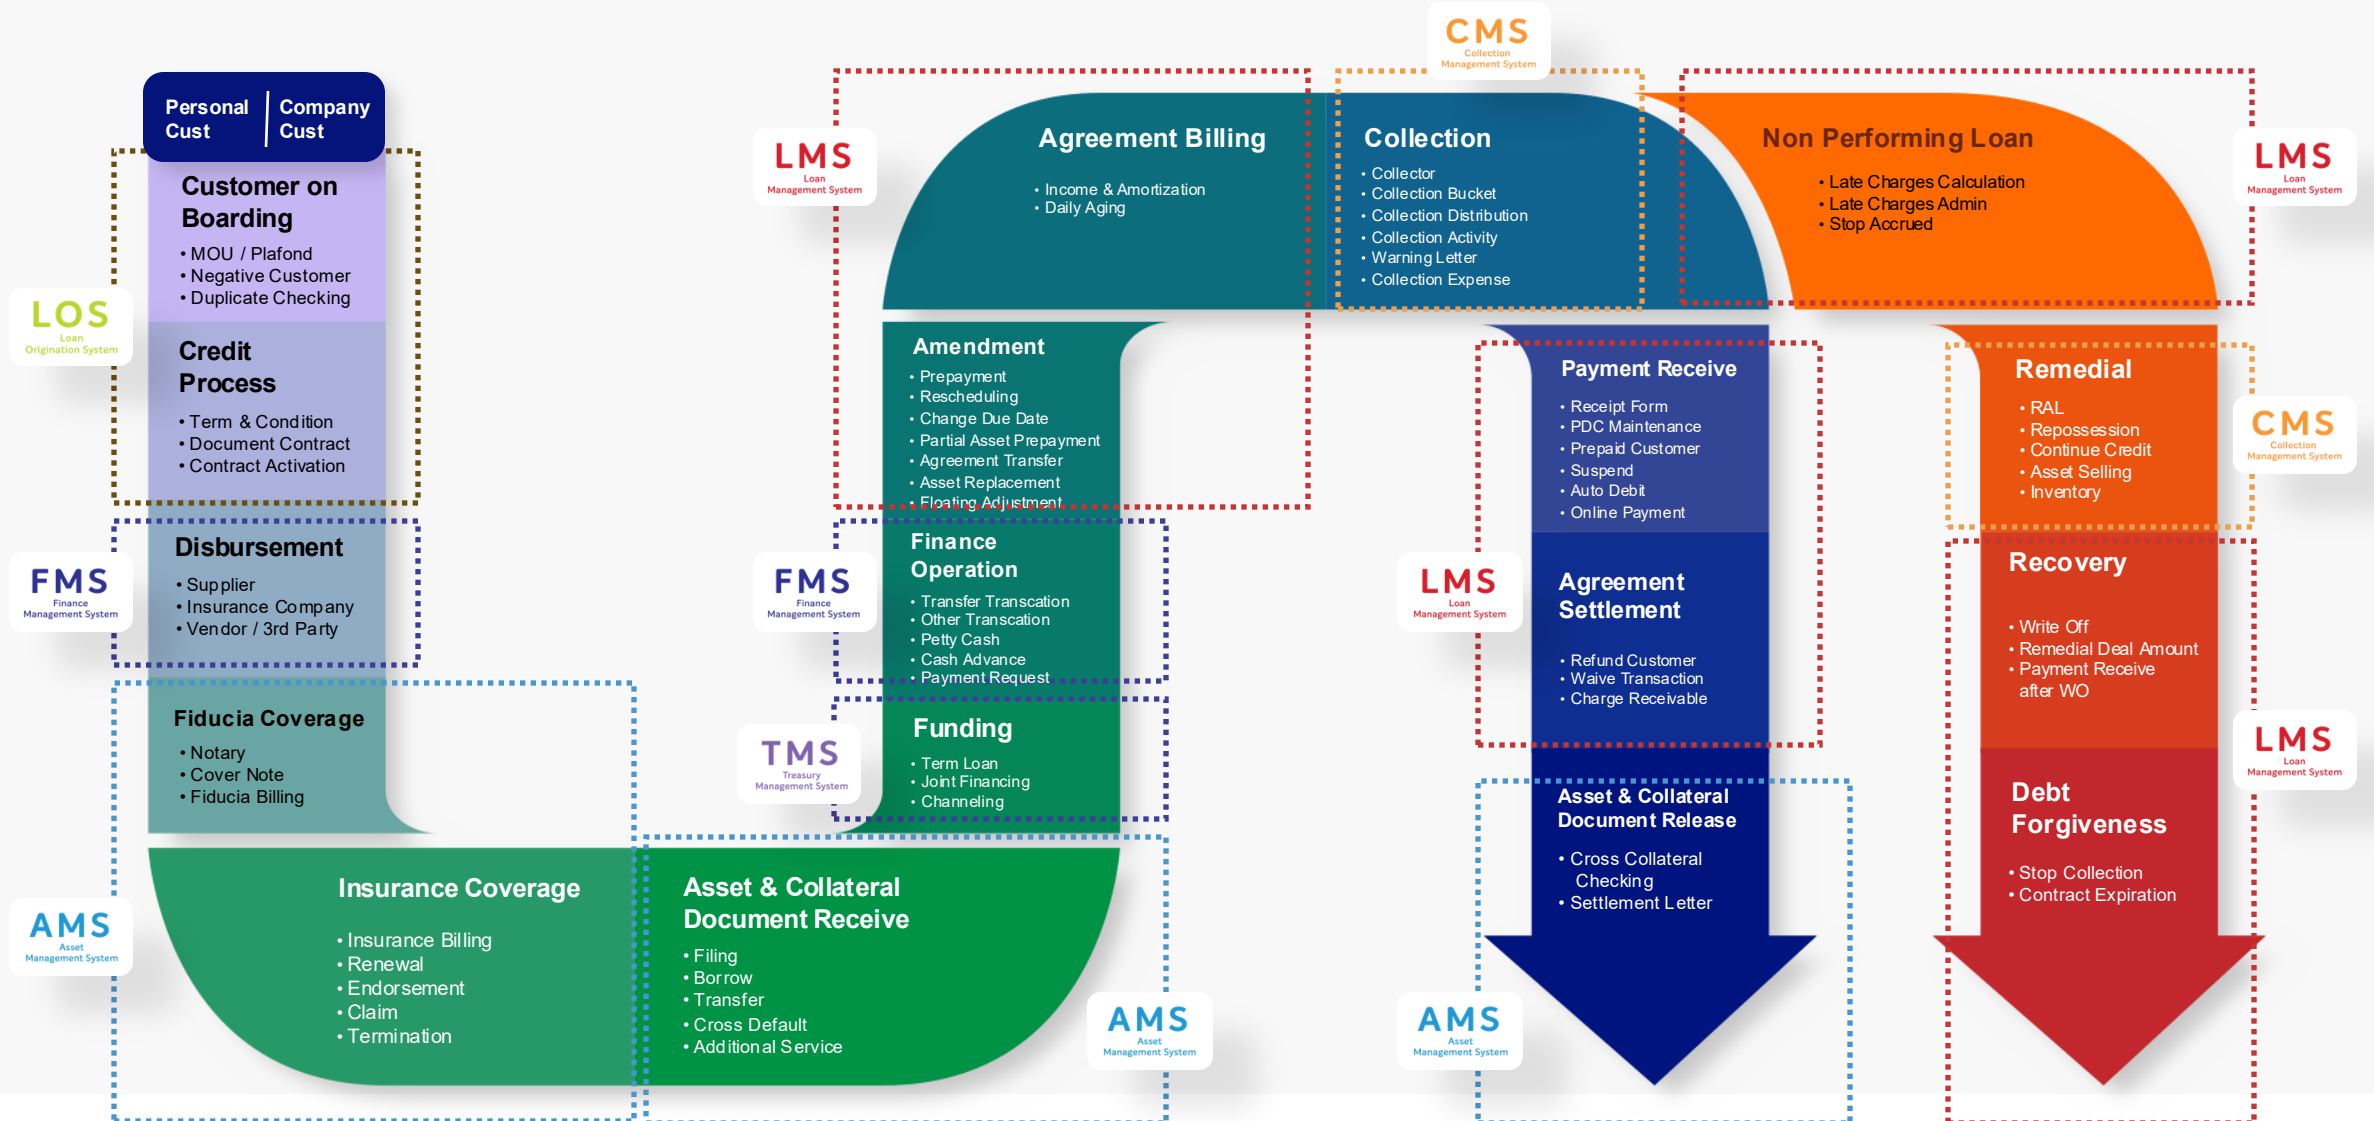

Process Centralization & Consolidation are feasible in the Systems.

Built in Operational Dashboard

Each Role has its own Operational Dashboard for Decision making

Q&A

A close-up photograph of two hands shaking in a firm grip. The hand on the left is wearing a blue suit sleeve and a light blue shirt cuff. The hand on the right is wearing a grey suit sleeve and a white shirt cuff. The background is a blurred teal and white.

THANK YOU
