Drafter	Muhammad Iqbal Fattah	Employee No		Date	2025-08-12
Doc. No	KB-IT -2025-5160				
Recipients					
Subject	AP-Debug Role UAT Tab and Content Not Shown-up				
Category	☒ Modify Data ☐ Request Permission ☐ Other				
Priority	☒ Normal ☐ Emergency				
Related Screen No	Website - CMS				
Reason for request	Currently, our company website is working well with no issues. We conducted a UAT test script to evaluate how the CMS performs and identified some bugs and errors in the system. These issues have been fixed and are also being developed on the hosting side. Right now, all content and buttons have been adjusted and fully support role-based users in managing their content on the website.				
Requests	Resolved a CMS-related bug during the execution of the UAT test script.
