Definition of Performance Appraisal

Performance Appraisal is a measuring instrument of work achievement of employees of PT Sunindo Kookmin Best Finance during a period of 6 (six) months of service.

NOTE

Through Performance Appraisal, it is expected that there will be an understanding between superiors and subordinates, regarding WHAT must be achieved (target / result) and HOW to achieve it (process), so that could increase achievement of the Company's goals.

Objectives of Performance Appraisal

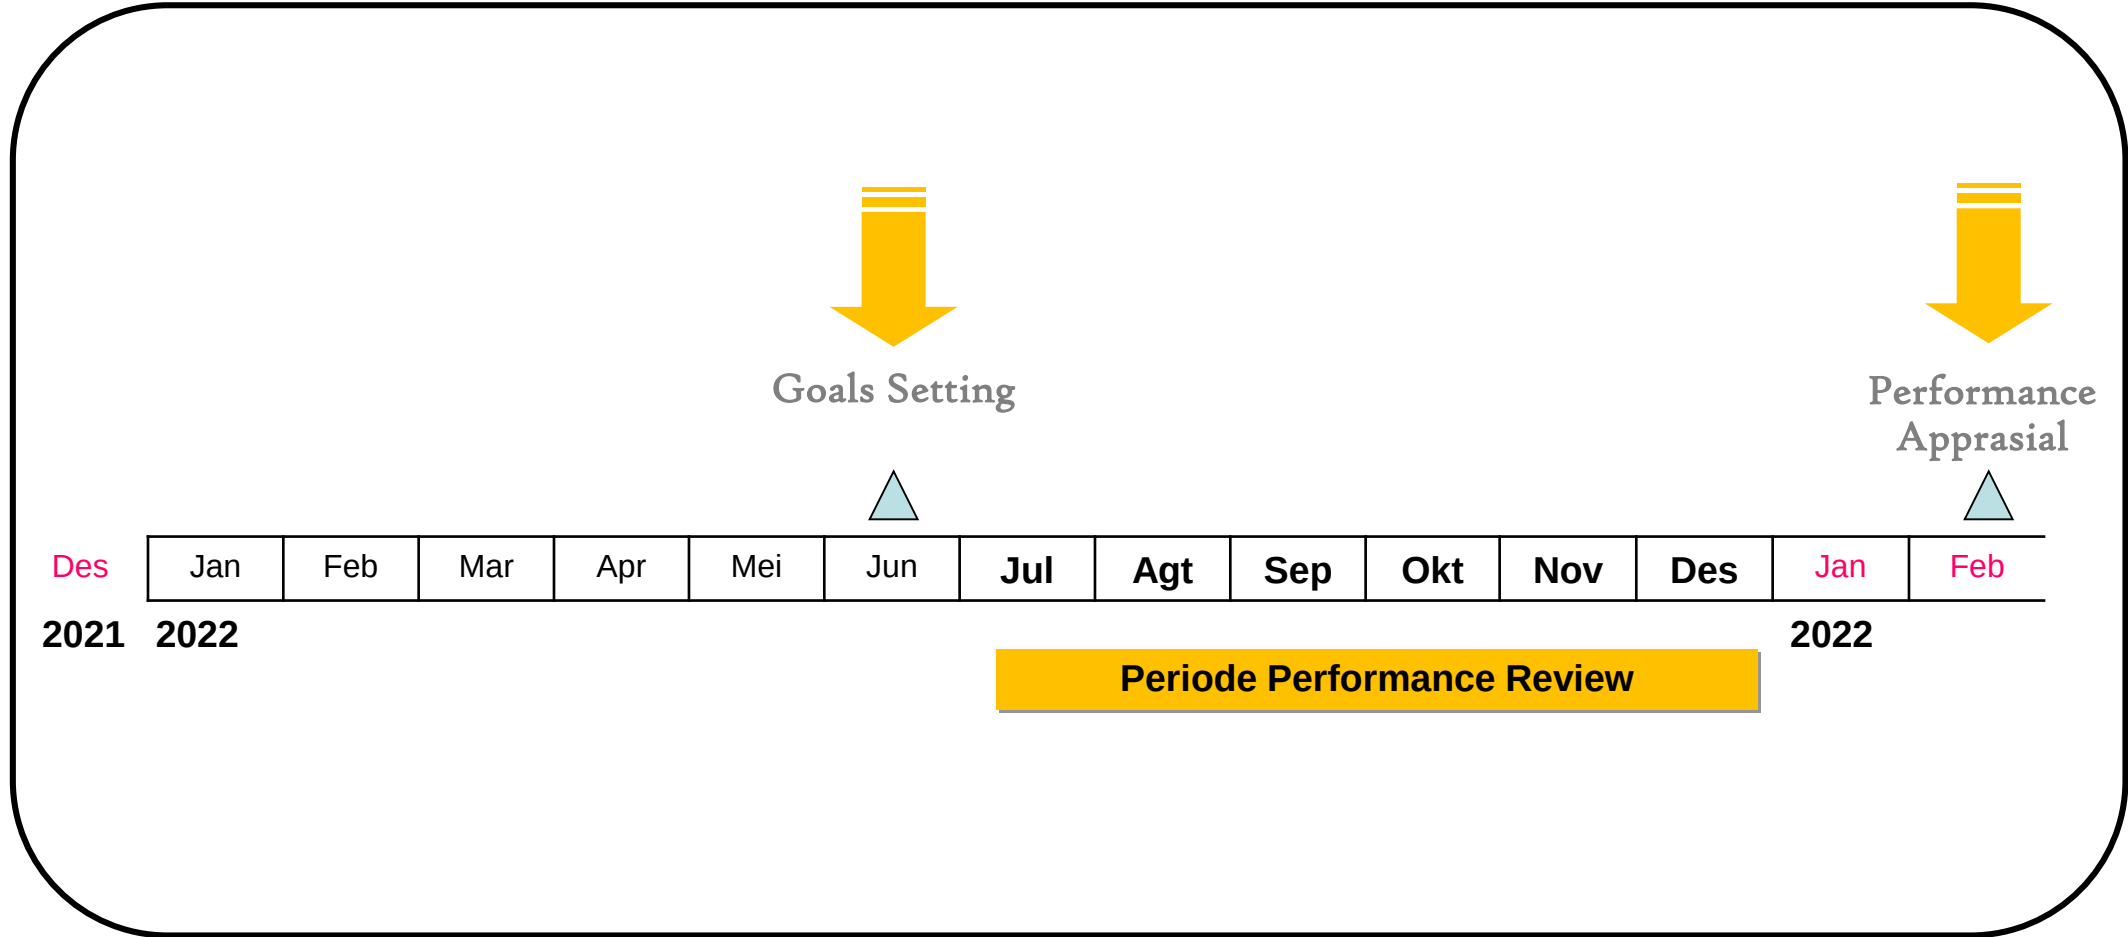

- Measuring Employee work results / performance / achievement of the target in period of 6 (six) months
- Knowing the level of employee competence

NOTE

Performance appraisal results can be used and applied to determine the needs of employee regarding training, promotion, salary increment, bonus, etc

Implementation Performance Appraisal

Assessment Stages

- 1 Superior provides the employee with an appraisal form for self-assessment
- 2 Superiors conduct an assessment based on employee self-assessment and their data
- 3 Superiors hold discussions with subordinates about the result of the assessment
- 4 Signing of the results of the assessment by superiors – subordinates
- 5 The results of the assessment that have been completely signed sent to HR
- 6 HR will do:
Input and recap Data; presentation of assessment results to the BOD
- 7 Execution of the assessment results approved by the BOD
