Drafter	Muhammad Iqbal Fattah	Employee No		Date	2025-08-12
Doc. No	KB-IT -2025-5172				
Recipients					
Subject	SKBF202508-07-02 (AP- Development CMS Website)				
Category	☐ Modify Data ☐ Request Permission ☒ Other				
Priority	☒ Normal ☐ Emergency				
Related Screen No	Company Website - CMS				
Reason for request	As the company's website continues to evolve, the need for a more efficient and flexible content management approach becomes essential. Relying on hardcoded updates for new or upcoming content is time-consuming, requires technical intervention, and slows down the publishing process. Developing a Content Management System (CMS) will enable authorized users to easily create, edit, and organize website content without modifying the source code. This will streamline content updates, reduce dependency on developers, improve publishing speed, and ensure the website remains dynamic, relevant, and adaptable to future needs.				
Requests	We kindly request to update the website's logic so that managing upcoming or existing content will no longer require hardcoding. A Content Management System will enable creating and managing public-facing content, allowing other departments to handle updates independently.
