About Me

I'm Muhammad Iqbal Fattah, S.Kom

An IT professional with experience in web application development for 2 years, primarily using Laravel, with experience in DBMS such as DB2 and MySQL. I have been involved in the application development lifecycle, from requirements analysis and system design to development, testing, deployment, and maintenance. I have strong problem-solving skills, attention to detail, and the ability to translate business requirements into effective digital solutions. I am comfortable working independently or collaboratively. I am also open to expanding my technical expertise in ASP.NET, Flutter, Python, and Java Spring Boot.

Working Experience

- Currently not employed, while actively preparing for my next professional opportunity.
- Managing production activities for personal IT portofolio, personal project
- Continuously learning and practicing Laravel, ASP.NET, Java Spring Boot, Git, and React to strengthen my technical skills.
- Staying adaptable to industry needs and preparing myself to contribute effectively when joining a new team.

- 
- **Worked at PT. Sunindo Kookmin Best Finance**
 - IT Software Development (**Staff**) — 1 Year 3 Months (May 2025– August 2026)
 - Developed a Learning Management System (LMS) using Laravel as a **Full-Stack Developer**.
 - Maintained and enhanced the Company Website and LMS, including bug fixes.
 - Troubleshoot user issues and handled daily ticketing requests from the Core System or the Supporting System.
 - Created technical documentation and business process flows.

- 
- **Worked at PT. Victoria Insurance, Tbk.**
 - IT Business Development (**Intern**) — 6 Months
 - Juli 2024 - Agustus 2024 (3 mo) & Juni 2023 - Aug 2023 (3 Mo)
 - Developed web-based applications to support insurance business needs.
 - Implemented requested features using Native PHP and supporting web libraries, with a focus on **front-end development**.
 - Deployed developed applications to the hosting environment.

- Bachelor of Computer Science (SI)
- GPA : 3,43/4.00
- Core Informatics Skills: From Technical to Soft Skills
- Studied and explored the Fundamentals of AI (Python).
- Participated in online courses through Coursera to continuously develop my knowledge and skills about Project Management, AI Fundamentals, and Java Spring Boot.
- Actively participated in socialization and community engagement programs, developing communication, teamwork, and interpersonal skills.

- 
- **Student at SMA TARUNA MANDIRI (2018 - 2021)**
 - IPA student who actively participated in school activities and events, gaining experience in teamwork and event participation.

Portfolio

Learning Management System

Web-based platform for managing courses, learning materials, assignments, assessments, user access, and learning progress.

Background/Problem :

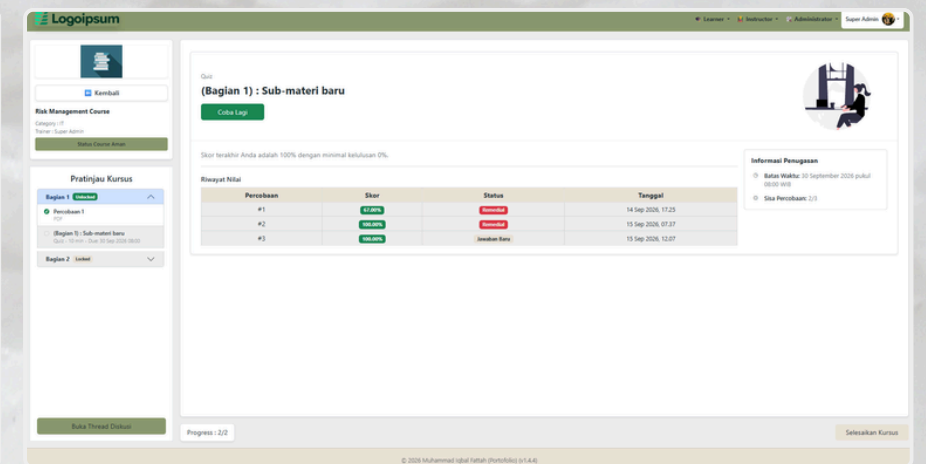

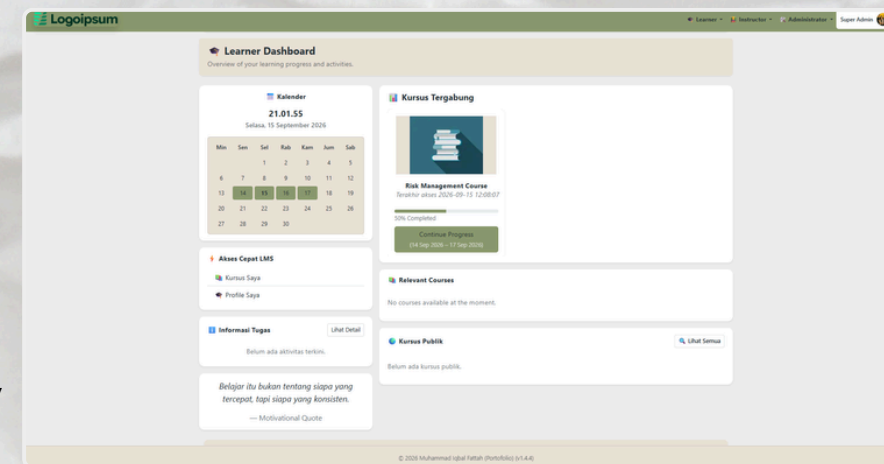

- Before the LMS was introduced, employee training was conducted offline by the HR team, requiring scheduled sessions and additional costs for employee refreshments. This made the training process less flexible and could interfere with employees' working hours.
- The LMS enabled employees to complete training online at their convenience, improving flexibility and reducing operational costs. It also supported the HR team in managing training administration, documentation, and continuous employee development programs in line with OJK requirements.
- The LMS is routinely used every month by all 140 employees of PT. Sunindo Kookmin Best Finance.

Technical Stack :

- Backend: Laravel (MVC)
- Frontend: Blade, HTML, CSS, JavaScript
- Database: MySQL
- API: REST API
- Follow ISO 27100:2022 Security Concept

Features Stack :

- User & Role Management
- Course Management
- Course Release & Takeover
- Learner Assignment Management
- Quiz & Examination
- Learning Progress Tracking
- Due Date & Course Schedule Management
- Notification
- Stage Approval Workflow
- Search & Filtering
- Activity & Audit Log
- Report Export to Excel
